PRINT & PLAY · Rulebook v23

ENTREPRENEURS

Buy land · build industry · supply your rivals · corner the market

Every number on these sheets is read out of the game's rules engine when the file is generated, so the table plays exactly the edition in the rulebook. Under Rulebook v23 a company is paid by the **band of demand it reaches**: count the icons, read the band on the card, multiply the price. The components are built around that one reading.

What is in the file

1. Cover p. 1
2. Design system p. 2
3. Setup & road prices p. 3
4. District tiles 1 p. 4
5. District tiles 2 p. 5
6. District tiles 3 p. 6
7. District tiles 4 p. 7
8. Blueprints 1 p. 8
9. Blueprints 2 p. 9
10. Blueprints 3 p. 10
11. Blueprints 4 p. 11
12. Blueprints 5 p. 12
13. Blueprints 6 p. 13
14. Blueprints 7 p. 14
15. Personas, IPO, reminders p. 15
16. Megacorp tiles p. 16
17. Market board p. 17
18. Action board p. 18
19. Player boards 1 p. 19
20. Player boards 2 p. 20
21. Player boards 3 p. 21
22. Player aid (front / back) p. 22
23. Band reference p. 23
24. Money $1 p. 24
25. Money $2 p. 25
26. Money $5 p. 26
27. Money $10 p. 27
28. Money $20 p. 28
29. Money $50 p. 29
30. Tokens 1 p. 30
31. Tokens 2 p. 31

How to print

- **A4, 100% scale, no fit-to-page.** On US Letter print at 94%. Everything sits inside a 10 mm margin.
- Cards and tiles on 200–250 gsm card; boards and aids on plain paper or 120 gsm.
- Cut on the printed outlines. Nothing bleeds, nothing needs a die.
- Colour is a convenience, not a requirement: each industry also carries its glyph and its two-letter code, so a greyscale print plays the same game.

How many copies

Design system, setup, market, action board	1 each
District tiles (20)	1 set
Blueprint cards (60), personas, Megacorp tiles	1 set
Player boards	1 sheet per 2 players
Player aid & band reference	1 per player
Money	see the money page
Tokens	1 set (fallback for 3D-printed pieces)

The design system

Six industries, each carrying three signals at once - a colour, a glyph and a two-letter code - on every component where it appears. The colours are the engine's own set, checked in CIE Lab against the three dichromacies; the glyph and the code are what carry the game in greyscale.

	Industry	Base price	Grows	Pays its bill to	Its pot is paid by	Band ladder: $$ from / $$$ from → price × ($ / $$ / $$$)

Greyscale proof

▲ UT ■ RE ● HO ⬢ MA ✚ HC ◆ TE

The same six chips with the colour removed. A player reads the glyph and the code; the hue is a bonus.

Player colours

1 2 3 4 5 6

A disc shows **who**; a block shows **what**. The two sets never share a hue.

Reading the board

Disc under a block	who owns the land - the landlord, paid $2 a level a quarter by whatever stands there
Block	a company; its height is its level. A horizontal company puts one block on each plot it covers, a vertical one stacks them
Disc on top of a block	who owns the business - not always the landlord
Branch token	a Retail shopfront on somebody's plot: the chain counts that district's icons, the landlord collects $2
Hub token	a Logistic Hub; the plot is filled for good and its district joins the network
HQ marker	a Megacorp headquarters: it has stopped trading, banks its industry's price ÷ its tile's tier each quarter, and counts as a hub
$ · $$ · $$$	the three revenue bands. A company is paid the current price of its industry × the multiplier of the band its icon count falls in

Setup

Seats: cash / Blueprints

Players	Seat 1	Seat 2	Seat 3	Seat 4	Seat 5	Seat 6
6	$25 / 1	$22 / 2	$22 / 2	$19 / 3	$19 / 3	$16 / 4
5	$25 / 1	$22 / 2	$22 / 2	$19 / 3	$16 / 4	–
4	$25 / 1	$22 / 2	$22 / 2	$19 / 3	–	–
3	$25 / 1	$22 / 2	$19 / 3	–	–	–
2	$20 / 2	$20 / 2	–	–	–	–

Seats are drawn at random. Blueprints are drafted in **reverse seat order** - the last seat picks first - from the face-up top cards of the six industry decks, which are shuffled whole.

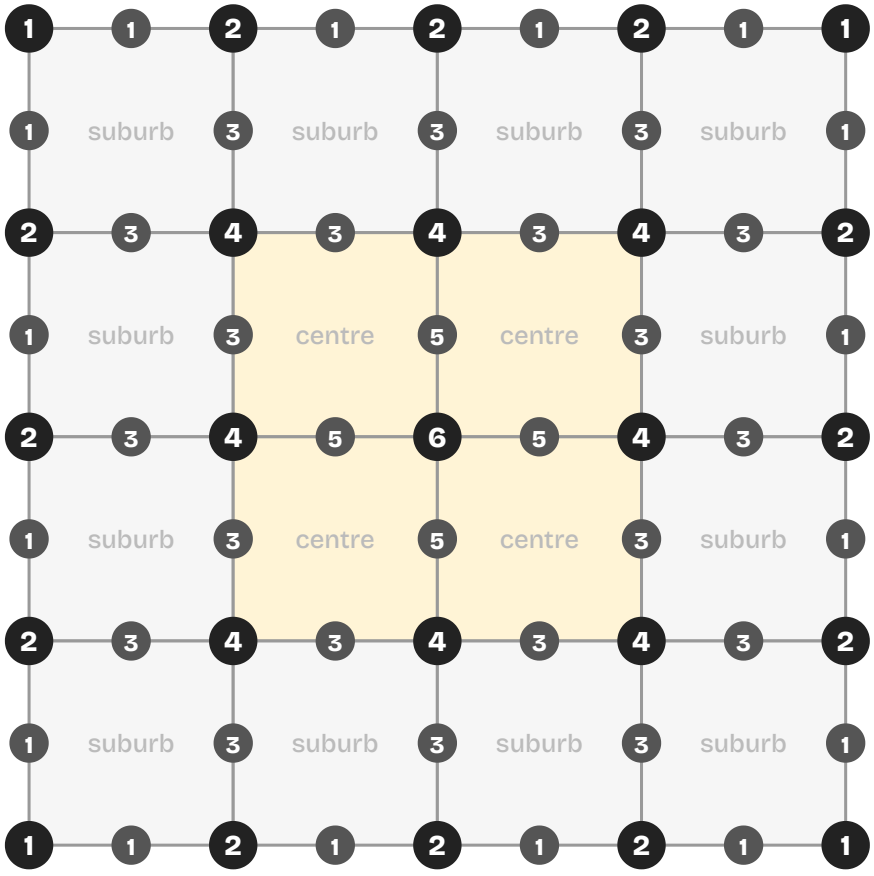

On the table

- The four centre tiles shuffled into the middle 2×2; twelve of the 16 suburb tiles drawn for the ring around them.
- Price markers on the base prices. Every pot empty.
- 12 discs and 2 workers each (3 each at two players); one persona each, face up.
- Megacorp tiles: two from each tier in play - tiers 4 and 3 always, tier 2 from 3 players, tier 1 from 4; three per tier at five players, all sixteen at six.
- Working tracks: 4 slots each at two to four players, 5 at five, 6 at six. Board Meeting: 2 seats, the second sealed until the IPO tile is claimed.
- The game is 8 quarters: two years. The three-year variant plays 12.

The draft, then the first quarter

- Last seat picks first, one face-up top card at a time, until every seat has its count.
- Planning starts with the first seat. Two workers each, three at two players.
- Every company is paid at the Closing of the quarter it is built in - there is no waiting for a delivery.

Road prices

A plot's road price is the number on the road point it touches: a **corner plot** (NW, NE, SW, SE) reads its district's corner, an **edge plot** (N, E, S, W) reads the middle of that edge. The price is fixed by position, so the mat is printed once; lay the sixteen tiles on it, or beside it.

A plot **costs its road price + $3 for every structure standing on it or orthogonally touching it**, and sells for the same. The centre is dear because the four centre districts meet there.

Prices run 1 on the outer edge to 6 in the dead centre, with 3s and 5s on the middles of the roads between districts.

◆ **TE** persona

Systems Architect

Your Technology companies may upgrade vertically, stacking on one plot instead of needing a free neighbour - or spread as Technology usually does. You choose at each upgrade.

one each · public from the start

✚ **HC** persona

Public Health Director

Your Healthcare companies reach every column of a Healthcare row whatever their level - they may count all four icons where a level-1 company counts one.

one each · public from the start

⬢ **MA** persona

White-Label Supplier

Your Manufacturing may be paid the best price among the rows of its own district, its own row included: that price is what its band multiplies.

one each · public from the start

● **HO** persona

Resort Developer

Your Hospitality companies may upgrade horizontally, spreading across plots so more businesses and hubs sit adjacent to them - or stack as Hospitality usually does. You choose at each upgrade.

one each · public from the start

■ **RE** persona

Supply Chain Expert

At the start of Closing, you may raise one industry you do NOT operate by one step; your Retail then reaches one extra district this quarter. You may also decline.

one each · public from the start

▲ **UT** persona

Concession Holder

At the start of Closing you may switch your concession on: your Utilities are then paid $1 over the current price this quarter - their band multiplies the higher price. Every quarter you are paid at that premium, the Utilities price falls one step at the end of the quarter.

one each · public from the start

IPO tile

The first Megacorp

Claimed by the first player to go public. A **sixth company bay** for the rest of the game, and the second Board Meeting seat opens for everybody. No EP.

1st turn order

First player

Places the first worker each Planning, chooses where the Logistic Hub goes each Closing. REPOSITION at the Board Meeting takes this card.

Q4 • **Q8** year end

At the end of a year

Land awards: 4 EP + the player count to the outright leader in plots built on, and again in districts stood in (6 at two seats, 10 at six; a two-way tie pays 40%, three or more 20%).

Loan buy-back: $30 at Year 1, $40 at Year 2 - $50 at Year 3 in the three-year game.

TIER 4 · price ÷ 4 · EP each quarter	**Local Syndicate** L1 L1 L1 · 3 × L1 · from 2 players	+8 EP	TIER 4 · price ÷ 4 · EP each quarter	**Founders' Pact** L1 L1 L2 · 2 × L1 + 1 × L2 · from 2 players	+9 EP	TIER 4 · price ÷ 4 · EP each quarter	**Continental Holdings** L1 L1 L1 L1 · 4 × L1 · from 2 players	+10 EP

TIER 3 · price ÷ 3 · EP each quarter	**Regional Consolidated** L2 L2 L3 · 2 × L2 + 1 × L3 · from 2 players	+13 EP	TIER 3 · price ÷ 3 · EP each quarter	**Crosstown Alliance** L1 L1 L2 L2 · 2 × L1 + 2 × L2 · from 2 players	+13 EP	TIER 2 · price ÷ 2 · EP each quarter	**Metro Trust** L2 L3 L3 · 1 × L2 + 2 × L3 · from 3 players	+14 EP
TIER 2 · price ÷ 2 · EP each quarter	**Crossroads Deal** L1 L2 L2 L2 · 1 × L1 + 3 × L2 · from 3 players	+14 EP	TIER 2 · price ÷ 2 · EP each quarter	**Skyline Consolidated** L3 L3 L3 · 3 × L3 · from 3 players	+15 EP	TIER 2 · price ÷ 2 · EP each quarter	**Apex Group** L2 L2 L3 L3 · 2 × L2 + 2 × L3 · from 3 players	+16 EP
TIER 1 · price ÷ 1 · EP each quarter	**Titan Industries** L3 L3 L4 · 2 × L3 + 1 × L4 · from 4 players	+17 EP	TIER 1 · price ÷ 1 · EP each quarter	**Colossus Group** L3 L3 L3 L3 · 4 × L3 · from 4 players	+19 EP	TIER 1 · price ÷ 1 · EP each quarter	**Empire Holdings** L2 L3 L3 L4 · 1 × L2 + 2 × L3 + 1 × L4 · from 4 players	+20 EP
TIER 1 · price ÷ 1 · EP each quarter	**Omnicorp** L3 L3 L3 L4 · 3 × L3 + 1 × L4 · from 4 players	+22 EP						

Merge exactly the combination printed - the merged companies go distressed, one stays as the headquarters. The tier is a divisor: tier 1 banks the most every quarter. A second Megacorp calls the next quarter as the last.

Market

price track · band ladders · industry pots

▲ UT Utilities	$2	$3	$4 base	$5	$6	$7	$8	$9	$10	$11	$12
■ RE Retail	$2	$3	$4 base	$5	$6	$7	$8	$9	$10	$11	$12
● HO Hospitality	$2	$3	$4	$5 base	$6	$7	$8	$9	$10	$11	$12

Action tracks

place left to right · resolve right to left

PLACE → one worker at a time, in turn order, until all are placed

Raise Capital

LOAN +$20 for a disc · SELL a Blueprint, a company or a plot

1	2	3	4	5 (5+ players)	6 (6 players)

M&A

BUY a plot or a distressed structure · LAUNCH a Blueprint on owned ground

1	2	3	4	5 (5+ players)	6 (6 players)

R&D

RESEARCH the top card of a deck · UPGRADE a company you own

1	2	3	4	5 (5+ players)	6 (6 players)

← RESOLVE: the last worker placed acts first, and every worker takes one action **+1 for each worker placed after it**

Board Meeting

both your workers · GO PUBLIC (merge for a Megacorp tile) · REPOSITION to first in turn order

1	2 (opens with the IPO tile)

Quarters

Q1	Q2	Q3	Q4	Q5	Q6	Q7	Q8	Q9	Q10	Q11	Q12
			YEAR END · land awards · loans $30				YEAR END · land awards · loans $40 **game ends**	3-year game	3-year game	3-year game	3-year game YEAR END · land awards · loans $50

A second Megacorp calls the following quarter as the last one (capped at the final quarter). Final tie: most active companies, then most money, then fewest loan discs in the bank.

Turn order

1	2	3	4	5	6

REPOSITION moves a player to 1st; the hub placement and the first worker belong to 1st

Closing, in order

nobody is handed the board

1. Persona choices: concession on? supply-chain step?
2. Every company pays its bill: $2 a level to each landlord, the rest into its suppliers' pots. Short? Sell at half.
3. **Count · band · multiply.** Each company counts the icons of its industry it reaches, reads its band on the card, and is paid that × the price. All at once.
4. Each Megacorp HQ banks its price ÷ tier; each rival company beside it takes 1 EP off its owner.
5. Each pot is split evenly among its industry's companies; what is left over, or a pot with nobody in its industry, waits.
6. The first player places a Logistic Hub on an empty unowned plot.
7. Q4 and Q8: the two land awards, then loans may be bought back.

PLAYER 1

12 discs · 5 companies · hand of 5 Blueprints

DISCS one on each plot you own, one on each company, one in the bank per loan

1 2 3 4 5 6 7

8 9 10 11 12

LOANS $20 each for a disc · −5 EP each still in the bank at the end

buy back at a year end: $30 · $40 · $50 (3-year game)

COMPANIES

company 1 | company 2 | company 3

company 4 | company 5 | IPO bay with the IPO tile

A QUARTER

1. **PLANNING** place your workers, one at a time, in turn order.
2. **ACTION** the tracks resolve right to left; take your actions.
3. **CLOSING** everything settles, in this order:
   1. Personas: concession on? supply-chain step?
   2. Every company pays its bill: $2 a level to each landlord, the rest into its suppliers' pots. Short of cash? Sell at half.
   3. **Every company is paid:** count the icons of its industry it reaches → read the band on the card → × the price. All at once.
   4. Megacorp HQs bank price ÷ tier; each rival company beside one takes 1 EP off its owner.
   5. Each pot is split evenly among its industry's companies.
   6. 1st player places a Logistic Hub on an empty unowned plot.
   7. Year end (Q4, Q8): land awards; buy back loans.

SCORE

- +3 EP the first time you build in each industry
- +2 EP a level, when built and again when upgraded
- Megacorp: the tile's EP, then price ÷ tier every quarter
- Land awards at each year end, outright leader only
- +1 EP per $100 at the end · −5 EP per unpaid loan

- Megacorp: the tile's EP, then price ÷ tier every quarter
- Land awards at each year end, outright leader only
- +1 EP per $100 at the end · −5 EP per unpaid loan

PLAYER 5

12 discs · 5 companies · hand of 5 Blueprints

DISCS one on each plot you own, one on each company, one in the bank per loan

1 2 3 4 5 6 7
8 9 10 11 12

LOANS $20 each for a disc · −5 EP each still in the bank at the end

buy back at a year end: $30 · $40 · $50 (3-year game)

COMPANIES

company 1 | company 2 | company 3
company 4 | company 5 | IPO bay with the IPO tile

A QUARTER

1. **PLANNING** place your workers, one at a time, in turn order.
2. **ACTION** the tracks resolve right to left; take your actions.
3. **CLOSING** everything settles, in this order:
   1. Personas: concession on? supply-chain step?
   2. Every company pays its bill: $2 a level to each landlord, the rest into its suppliers' pots. Short of cash? Sell at half.
   3. **Every company is paid:** count the icons of its industry it reaches → read the band on the card → × the price. All at once.
   4. Megacorp HQs bank price ÷ tier; each rival company beside one takes 1 EP off its owner.
   5. Each pot is split evenly among its industry's companies.
   6. 1st player places a Logistic Hub on an empty unowned plot.
   7. Year end (Q4, Q8): land awards; buy back loans.

SCORE

- +3 EP the first time you build in each industry
- +2 EP a level, when built and again when upgraded
- Megacorp: the tile's EP, then price ÷ tier every quarter
- Land awards at each year end, outright leader only
- +1 EP per $100 at the end · −5 EP per unpaid loan

PLAYER 6

12 discs · 5 companies · hand of 5 Blueprints

DISCS one on each plot you own, one on each company, one in the bank per loan

1 2 3 4 5 6 7
8 9 10 11 12

LOANS $20 each for a disc · −5 EP each still in the bank at the end

buy back at a year end: $30 · $40 · $50 (3-year game)

PLAYER AID · a quarter in three phases

1 · PLANNING

Place your workers one at a time, in turn order. Early is more actions, late is better information.

2 · ACTION

Each track resolves **right to left**: the last worker placed acts first and takes 1 action + 1 per worker placed after it. Board Meeting takes both your workers for one action.

3 · CLOSING nobody is handed the board

1. Persona choices (concession, supply chain)
2. Bills: $2 a level to each landlord, the rest into the suppliers' pots
3. **Count · band · multiply** - every company at once
4. HQs bank price ÷ tier; 1 EP tithe to each rival beside them
5. Pots split evenly among each industry's companies
6. 1st player places a hub on an empty unowned plot
7. Year end: land awards, loan buy-back

COUNT THE ICONS YOU REACH

- Your industry's rows, columns up to your level, in every district you reach. Rows 1 and 4 are the same industry: two icons a column there.
- You reach the districts your plots stand in. A plot beside a hub puts you on the whole hub network; a Megacorp HQ counts as a hub.
- An icon is never used up - everyone who reaches it counts it.
- Read the band on your card: under the first threshold $, from it $$, from the second $$$. Multiply the price under your industry's marker.

INDUSTRY ABILITIES

UT counts a block of districts as wide as its level around it; never uses hubs

RE a chain is its level in shopfronts: a branch per level above the first, each on owned ground in a district it reaches; never uses hubs

HO counts each business or hub within its level in plots as an icon, on top of the grid

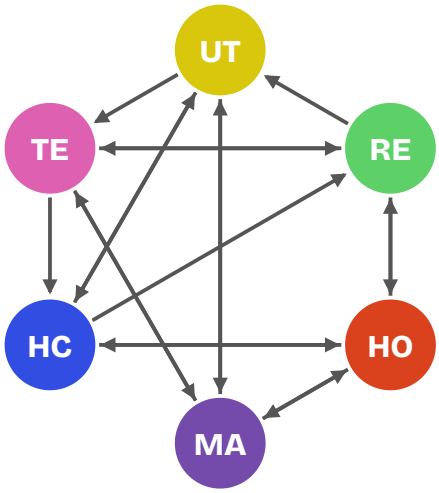

MA counts up to its level in icons from the other rows of its own district, on top of its own

HC reaches every district on the hub network without touching a hub

TE its band row is its own: the doubler is built into its multipliers

PLAYER AID · the money and the score

THE SUPPLY WEB arrows: who pays whom

Each industry pays three others and is paid by three. Building moves your own price down $1 and each supplier on the card up $1, on a $2–$12 track with hard ends.

SCORE

First company in an industry	+3
Each level, when built and again when upgraded	+2
Megacorp tile, once	+8 to +22
Megacorp HQ, every quarter it stands	price ÷ tier
Land awards, each year end, outright leader in plots built on / districts stood in	4 + players
Cash at the end, per $100	+1
Each loan disc still in the bank	−5

LAND

- A plot costs its road price + $3 per structure on or orthogonally beside it; it sells for the same.
- Rent $2 a level to each landlord; nothing on your own ground. A company needs all its ground owned by somebody to be paid.
- Loans: $20 for a disc; buy back $30 / $40 at the year ends ($50 at the third in the three-year game).
- Forced sales go at half. Sell a Blueprint for $4 / $8 / $12 by level.

THE END

After Q8, or the quarter after anyone's 2nd Megacorp. Ties: active companies, then cash, then fewer loan discs.

BAND REFERENCE · what a company is paid

Industry	Level	$$ from	$$$ from	$	$$	$$$
UT Utilities	L1	1	2	×1	×1	×2
	L2	4	6	×2	×4	×6
	L3	7	12	×7	×10	×12
	L4	14	24	×23	×24	×24
